- SEO

## RECENT PROJECTS

### AAIB - Quotation Management System (SPRING BOOT, Angular)

- Rebuilt the Entire System: Revamped the existing Quotation Management System to align with the new user interface standards.
- Enhanced User Experience: Implemented a modern, intuitive UI to streamline the quotation process for better user engagement.
- Seamless Integration: Enabled smooth integration with other internal systems and third-party services.

### Inventory Management System for Acme Nutrition (MERN)

- Developed from Scratch: Designed and built a comprehensive inventory management system using the MERN stack (MongoDB, Express, React, Node.js).
- Real-Time Tracking: Implemented real-time inventory tracking to monitor stock levels, incoming shipments, and outgoing orders.
- User-Friendly Interface: Created an intuitive interface for easy navigation and efficient management of inventory data.
- Automated Reporting: Added features for automated report generation to assist in decision-making and operational efficiency.
- Scalable Architecture: Ensured the system can handle future growth and increased data volumes without compromising performance.

### Inventory Management for Ramen Delight (MERN)

- Custom-Built Solution: Developed a tailored inventory management system specifically for Ramen Delight's unique requirements.
- Efficient Stock Management: Streamlined processes for tracking inventory, managing suppliers, and processing orders.
- Responsive Design: Ensured the system is accessible on various devices, providing flexibility for users to manage inventory on-the-go.

### Inner Software for a Rental Car Company

- Comprehensive System: Developed internal software to manage various aspects of the rental car business, including fleet management.
- Fleet Management: Implemented features for tracking vehicle availability, maintenance schedules, and utilization rates.
- Customer Relationship Management: Added tools for managing customer data and service history.
- Data Security: Ensured robust security measures are in place to protect sensitive business data.
